Subject: **NPA-201 Production Warning**  
To: Our Customers

Amphenol Advanced Sensors is in the process of moving the manufacturing location of our NPA-201 product. We will continue manufacturing NPA-201 but there will likely be an interruption in production. This may result in our lead times going beyond 52 weeks for an undetermined period of time.

Please be assured that Amphenol Advanced Sensors is dedicated to serving their new and existing customers. We are currently securing a guaranteed production window to ensure continuity of supply. At this point of time we encourage you to place orders before January 31 2020. We will review the volumes for all new orders. Please be advised that new orders are Non-Cancellable & Non-Returnable.

We very much appreciate your support and acceptance. Any further question please contact your Amphenol Account Manager.

Thank you
